Adebayo Adeniran

Enterprise Application Support [Digital Channels] || Backend Developer

Hi, I'm Adebayo Adeniran, an Application Support Engineer, and an experienced Backend Developer with years of experience supporting operations on robust Enterprise Applications, specifically Digital channel, and competent knowledge on developing fast, scalable & dynamic web applications with backend technology Node.Js and Front-end technologies HTML, CSS, Bootstrap

I have vast experience troubleshooting & resolving issues ranging from transaction failures, batch operations, login issues etc. that occur on Digital channels such as Internet Banking, Mobile Applications, POS, ATM, etc.

I'm passionate about technologies, whether that be development of these technologies, or supporting issues that occur during the use of these technologies. I'm a critical thinker, a team player, and one who relishes taking up challenges to profer solutions to them
