PROFILE

Adebayo Adeniran is a passionate "Front-End Developer", proficient in Reactjs as well as basic Back-End skills & languages.

An alumnus of the University of Lagos with a bachelor's degree focused in Petroleum engineering.

A critical thinker, a fast learner, a team player, possessing an analytical mind, & one who relishes taking up challenges to profer solutions to them.

Adebayo Adeniran is currently seeking an entry-level role as a front-end developer to utilize his knowledge and experience in developing dynamic applications, as well as blend the art of design with the skill of programming to deliver an immersive and engaging user experience through efficient website development and proactive feature optimization.

WORK EXPERIENCE

APPLICATION SUPPORT ENGINEER

CWG PLC. Finacle BOOTCAMP   **June 2022 – July 2022**

☐ I was equipped with valuable backend skills (SQL, UNIX) while making use of the Finacle Application used to provide core banking solutions to clients

FRONTEND DEVELOPER

Side Hustle BOOTCAMP 5.0   **May 2022 - Date**

☐ I put my skills and knowledge as a Frontend developer to test with the Side Hustle Bootcamp for cohort 5.0, which kicked off straight after the internship was concluded. Finalists from the internship were grouped into teams and tasked to come up with a Tech start-up

FRONTEND DEVELOPER

Side Hustle Internship 5.0   **April 2022 – May 2022**

☐ I worked in teams with fellow interns. Led and organized team66, as we successfully put out capstone projects after good mentorship during the internship from the instrucutors on **HTML, CSS, Javascript, & ReactJs**

WEB DESIGN INTERN

SED PROPERTIES LIMITED   **July 2020 – July 2020**
Suite D12-214, Block A, Akord shopping mall, Bojige, Lekki-Epe Exp.

☐ SED Properties is a real estate company that provides quality homes and afforable landed properties to its clients. I worked as an intern web designer and was tasked with adding functioanlity to the website, images, & mobile responsiveness

PROJECTS

⬚ LANDING PAGE FOR A SHOE STORE

niranisking.github.io/landingpage/

⬚ Designed this landing page for a shoe store website making use of Sass as preprocessor. Javascript to add functionality and toggle effect on the navbar. Basic CSS properties for styling, majorly floats and radial gradients. Flexbox for positioning and Github for project management

⬚ A WEBSITE FOR FRUIT RECIPES

niranisking.github.io/fruit-recipes/

⬚ I made use of external resources to put together great information for users on good nutrition and their health benefits with this project. Sass for preprocessor. Javascript to add functionality and toggle effect on the navbar.Grid as well as Flexbox properties for positioning and centering elements & Media Queries for layouts on different

⬚ FYLO (Capstone Project – Side Hustle Internship 5.0)
niranisking.github.io/team66capstone/

⬚ Worked as a team with a group of talented interns on a capstone project, spearheading proceedings as team lead, to develop a website for an organization (FYLO) which provides storage services to its clients. I took care of the design and layout of the navigation bar as well as the features section of the website and invited my co-interns to collaborate, develop and design other sections of the website.

⬚ TIIDELab Mini Project
https://niranisking.github.io/TIIDELabMiniProject/

⬚ The TIIDELab Mini Project was a task given to be completed as part of the selection process for cohort 4.0 of the internship . The frontend of the Mini Project was built making use of just HTML5 & CSS3 and Javascript was used to add a search functionality to the frontend already styled with CSS. The set of user information rendered on the frontend was called up from jsonplaceholder database making use of RESTAPIs to interact with the endpoint
